# 1. C++11 Multiple Choice Question

```
According to the C++11 standard what is the output of this program

using namespace std;

int main()
{
    int i, &j = i;
    [=]
    {
        cout << is_same<decltype((j)), int          >::value
             << is_same<decltype((j)), int      &  >::value
             << is_same<decltype((j)), int const&  >::value
             << is_same<decltype((j)), int      && >::value
             << is_same<decltype((j)), int const&& >::value;
    }();
}
```

Pick **ONE** option
